

PRISMA

The Portable Acrylic Bevelling Machine

Exclusive mini acrylic bevelling machine with compact size capable of achieving high-quality finishes.

The prisma polishing machine can cut and polish edges at both 44 and 45° angles. This is perfect for the production of boxes and urns, as polishing at 44 leaves space for the glue and a millimetric joint between pieces is achieved. 100% geometric boxes.

This is an ideal machine for small manufacturers of exhibitors and displays.

**WORKS WITH
TOOLS THAT
