

## Wide Format Laminator RSH-381SL

- Up to 350mm (13.7") actual laminating width for RSH-381SL,
- Speed: 800 mm/min for lamination
- Cost-effective thermal encapsulation
- Large film roll capacity (up to 100mm / 3.9"diameter)
- Reverse function available.
- Temperature change from 40 ° to 140 °.
- Special design for film roll changed easily.
- Safety cover to ensure safe operation.
- Warranty period: 12 months

| Description                   | RSH-381SL              |
|-------------------------------|------------------------|
| Power Consumption             | 1300W                  |
| Max laminating width          | 350mm (13.7")          |
| Film thickness                | 25 ~ 175mic (1 ~ 6mil) |
| Max laminating speed          | 800mm/min              |
| Ready time                    | 4min                   |
| Drive motor                   | AC geared              |
| Max temperature control       | 140°C                  |
| Max. Film Diameter            | ø100                   |
| Film core size                | 2.25" Auto grip        |
| Cross cutter                  | Selectable             |
| Safety System                 | Safety cover           |
| Roller diameter               | ø30                    |
| Unit Weight                   | 19.4kg                 |
| Unit Dimensions (W x D x H)   | 598*358*308 (mm)       |
| Carton Dimensions (W x D x H) | 730 *455 * 445 (mm)    |
